

ADEDEJI ADEMIDE

Front-End Developer & AI Data Specialist

Contact (+234) 8134705269 | adedejiaudemide@gmail.com | [linkedin.com/in/ademide-adedeji](https://www.linkedin.com/in/ademide-adedeji) github.com/Grlynch00 | [Portfolio Link](#) | Ibadan, Oyo State (Open to Remote)

PROFESSIONAL SUMMARY

Highly analytical and results-driven professional with a dual specialization in **Front-End Development** and **AI Data Specialization/Prompt Engineering**. Proven ability to deliver seamless, interactive user experiences while optimizing development workflows through applied AI tools and data analysis. Seeking to leverage a strong foundation in modern web technologies (HTML5, CSS3, JavaScript) and Python to contribute to challenging, impactful remote projects.

TECHNICAL SKILLS

Category	Skills
Front-End	HTML5, CSS3, JavaScript (ES6+), Responsive Design, Clean Code, Debugging
Back-End/Tools	Python, Git, GitHub, API Integration
AI & Data	Prompt Engineering, AI Data Specialization, Workflow Automation

PROFESSIONAL EXPERIENCE & PROJECTS

FREELANCE FRONT-END DEVELOPER & AI SPECIALIST | Remote *January 2022 – Present*

- Full-Cycle Development:** Managed the complete development lifecycle for multiple client and personal web applications, from initial concept and design to deployment and maintenance.
- Workflow Automation:** Leveraged advanced AI tools and prompt engineering techniques to automate routine development tasks, achieving an estimated **35% reduction** in time spent on data organization, testing, and task optimization.

- **Independent Problem-Solving:** Cultivated strong time management and independent problem-solving skills through self-directed study and project execution in fast-paced environments.

Selected Projects (Integrated Experience)

CoinTracker (Financial Data Visualization Application)

- Developed a fully responsive web application to track and visualize real-time cryptocurrency market data, serving as a critical tool for market analysis.
- Applied Python for efficient data fetching and JavaScript for dynamic, asynchronous rendering, which led to a **25% increase** in user engagement during beta testing due to improved data freshness and interactivity.
- **Technologies Used:** HTML, CSS, JavaScript, Python, RESTful API Integration.

Local Bites (Community Food Discovery Platform)

- Engineered a mobile-first platform designed to connect users with local food vendors, emphasizing accessibility and a superior user experience.
 - Implemented modern CSS techniques (Flexbox/Grid) to create a clean, user-friendly interface, successfully improving the site's initial load time by **40%** and enhancing overall performance metrics.
 - **Technologies Used:** HTML, CSS (Flexbox/Grid), JavaScript, Responsive Design.
-

EDUCATION

LADOKE AKINTOLA UNIVERSITY OF TECHNOLOGY, OGBOMOSHO, OYO STATE B.Sc.

Computer Science | October 2021 – Present (Expected Graduation: 2025)

- Coursework focused on practical software development, data structures, and algorithms.
- Applied core front-end development (HTML, CSS, JavaScript) and Python skills to academic and personal projects.
