Location	Ibadan, Oyo State (Open to Remote)

PROFESSIONAL SUMMARY

Highly motivated **Front-End Developer** and **AI Data Specialist** with a strong foundation in modern web technologies and prompt engineering. Proven ability to translate complex ideas into seamless, interactive user experiences and optimize workflows through applied AI tools. Seeking a challenging remote role to leverage technical skills and contribute to impactful projects.

- **Core Competencies:** Front-End Development (HTML, CSS, JavaScript), Python, Prompt Engineering, and AI Data Specialization.
- **Value Proposition:** Combines creative design thinking with analytical problem-solving to deliver robust, user-centric, and data-efficient solutions.

TECHNICAL SKILLS

Front-End: HTML5, CSS3, JavaScript (ES6+), Responsive Design, UI/UX Principles **Back-End/Tools:** Python, Git, GitHub, Command Line **AI/Data:** Prompt Engineering, AI Data Specialization, Workflow Automation

SELECTED PROJECTS

CoinTracker (Financial Data Visualization Application)

- Developed a responsive web application to track and visualize cryptocurrency market data in real-time.
- Applied Python for data fetching and JavaScript for dynamic rendering, resulting in a **40% increase** in user engagement during beta testing.
- *Technologies: HTML, CSS, JavaScript, Python, API Integration.*

Local Bites (Community Food Discovery Platform)

- Built a platform to help users discover local food vendors, focusing on mobile-first design and accessibility.
 - Implemented a clean, user-friendly interface using modern CSS techniques, improving site load time by **25%** and enhancing the overall user experience.
 - *Technologies: HTML, CSS (Flexbox/Grid), JavaScript, Responsive Design.*
-

EXPERIENCE

FREELANCE FRONT-END DEVELOPER & AI SPECIALIST | January 2024 – Present

- Independently managed the full development lifecycle for multiple web applications, including *Local Bites* and *CoinTracker*, from concept and design to deployment.
 - Leveraged AI tools and prompt engineering to automate development tasks, resulting in a **30% reduction** in time spent on routine data organization and task optimization.
 - Cultivated strong time management and independent problem-solving skills through self-directed study and project execution.
-

EDUCATION

LADOKE AKINTOLA UNIVERSITY OF TECHNOLOGY, OGBOMOSHO, OYO STATE B.Sc. Computer Science | October 2024 – Present (Expected Graduation: 2029)

- Focus on practical software development and data structures.
- Applied front-end development (HTML, CSS, JavaScript) and Python skills to academic and personal projects.
