PROFILE

Full-Stack Developer and AI Automation Engineer based in Ibadan, Nigeria. I build clean frontends and wire them to intelligent backends — from real-time crypto dashboards to Telegram bots. Currently studying Computer Science at LAUTECH, freelancing, and building in public. Open to remote roles.

SKILLS

Frontend

HTML5, CSS3
JavaScript (ES6+)
Responsive Design, Flexbox, Grid

Backend

Node.js (Learning)
Express.js (Learning)
Supabase

AI / Automation

Python
Telegram Bots
Workflow Automation

Tools & Other

Git & GitHub
REST API Integration
Data Operations

EXPERIENCE

Freelance Full-Stack Developer & AI Specialist · Remote

Jan 2022 – Present

- Built and shipped web applications end-to-end — layout, logic, API wiring, and deployment.
- Built Telegram bots and automation tools that handle tasks people would otherwise do manually.
- Used prompt engineering to cut time on repetitive dev work like data formatting and test scaffolding.
- Worked independently across full project lifecycles in async, remote environments.

PROJECTS

VogWorld + Admin CMS · E-Commerce & Content Management

2025

- Built a full premium streetwear storefront for a live Nigerian fashion brand — product catalog, shopping cart, WhatsApp checkout flow, and anniversary drop page.
- Developed a paired Admin CMS so the store owner can manage products, drops, and inventory without touching code.
- Responsive across all screen sizes with performance-first CSS — the kind of site that actually converts.

Stack: HTML5, CSS3, JavaScript (ES6+), Supabase, Responsive Design

Local Bites · Community Food Discovery Platform

2023

- Mobile-first platform connecting users to local food vendors, built with accessibility as a first-class concern.
- Flexbox and Grid handle the layout — consistent across every screen size without media query soup.

Stack: HTML5, CSS3 (Flexbox/Grid), JavaScript, Responsive Design

EDUCATION

Ladoke Akintola University of Technology (LAUTECH) · B.Sc. Computer Science

2022 – 2026 (Expected)

Ogbomosho, Oyo State · Data Structures, Algorithms, Software Development
